

SAFETY AND EFFICIENCY  
AT PATIENT BEDSIDE

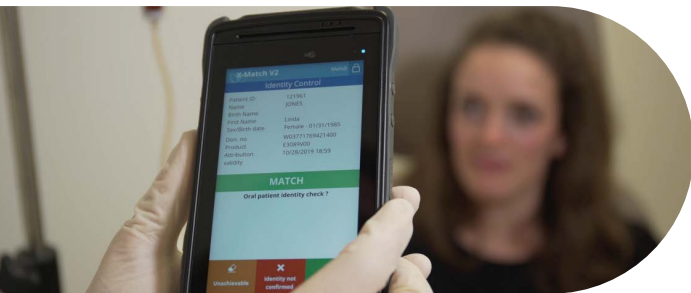

# PATIENT SAFETY

with X))MATCH

**Biolog Patient Safety module** ensures **the administration of the right product to the right patient.**

It is composed of a complete set of items including RFID tags, a handheld device\*, a mobile application (X-Match App\*\*) and a workstation (X-Match Desk\*\*).

)) **Guaranteed safety for patients:**

X-Match ensures the right product is administered to the right patient with the right dose at the right time via the right route.

)) **Improved working conditions for medical staff:**

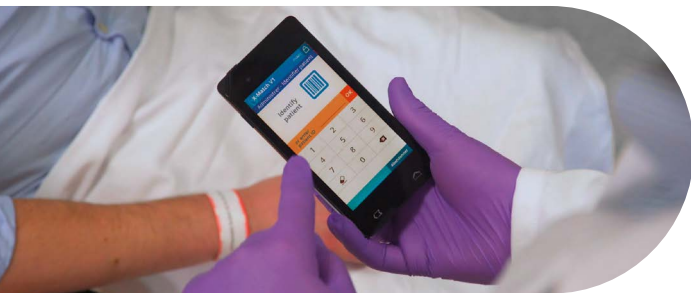

less stress and administrative tasks, more near-patient time.

)) **Enhanced efficiency and cost optimization:**

full traceability, automatic haemovigilance records, prevention of costs associated with administration errors.

)) **X-Match App can be used in offline mode,**

with no connection to the healthcare establishment computer network and provide the high safety level within healthcare wards or home care.

biolog ))id

\* Biolog-id can provide the handheld devices if requested

\*\* Product not cleared in North America and Brazil

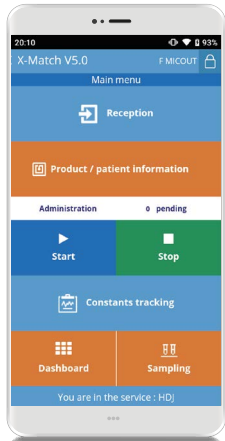

# PATIENT SAFETY

SAFETY AND EFFICIENCY  
AT PATIENT BEDSIDE

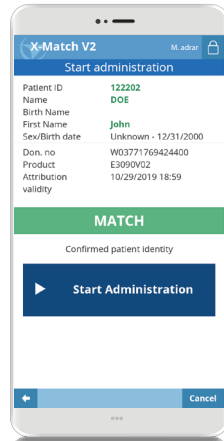

## A reliable assistant to the medical staff

X-Match App consists in comparing the product and patient information carried by the product with the information carried by the patient's identification wristband. The medical staff can then confirm the administration of the right product to the right patient.

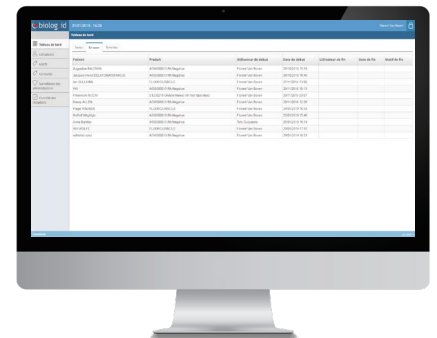

### The X-Match application guides the medical staff step by step:

- Samples tubes match recording
- Control at reception of the product
- Product / Patient check
- Administration times record (start, stop, pause)
- Vitals recording

### X-Match secures patient match:

- Match between the patient and the prescribed product to be administered

### X-Match desk records automatically all data from the application:

- All data from the app is transferred to X-Match desk and server for record
- All data can be retrieved at any time
